01 / PROFESSIONAL EXPERIENCE

01 Pareto May 2024 - Present

FullStack DeFi Developer

Architect Kubernetes systems and build the interfaces and services supporting an institutional credit platform. Integrate Web3 smart contracts into applications, connecting React and Vite frontends with onchain interactions and backend services. Design and scale an Nx monorepo across frontends, APIs, event processors and services.

02 Evologi Feb 2018 - Apr 2024

Front-End/Mobile Developer

Implemented web and mobile applications for OrderPod using Angular, Ionic and Flutter. Built interfaces for operational workflows across orders, product information and warehouse operations.

03 Maikii Jul 2016 - Jan 2018

Full Stack Developer

Worked on the WordPress implementation of Tribe-Tech, an e-commerce website for licensed consumer-tech accessories.

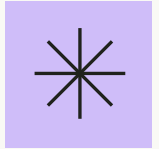

04 Insidecom Dec 2011 - Jul 2016

Full Stack Developer

Developed interfaces, CMS features, B2B tools and backend applications for the Venetoinside and Toscanainside tourism portals, working with Contao and Python.

Applications.

Systems. Everyday life.

02 / ONCHAIN · OPERATIONS · MOBILE

01 Pareto

Kubernetes architecture, smart-contract integration, React/Vite interfaces and Node.js/Fastify services for institutional credit onchain.

Pareto / Kubernetes · Web3 integration · React · Vite

02 OrderPod

Web and mobile applications for order management, product information and warehouse workflows, from stock to shipping.

Evologi / Angular · Ionic · Flutter · Web application

03 Alea Ambiente

Mobile development for local environmental services: collection calendars, sorting guidance and service information.

Alea Ambiente / Ionic · Flutter · Mobile development · Local services

04 Clean-Up

Customer-facing mobile application for booking one-off or recurring cleaning services on iOS and Android.

Sara Clean Management / Mobile development · Service booking · iOS & Android

05 FacileVetrina

I developed the iOS and Android mobile application using Ionic and Angular.

Local commerce · 2017 / Ionic · Angular · iOS & Android

06 Officina Fornari

Developed the Officina Fornari mobile application using Ionic and Angular for automotive services.

Officina Fornari / Ionic · Angular · iOS · Android
